How much PLN does a solar inverter cost in Poland?

In Southern Poland the figure is more like 1200-1400 per year. So if that installation cost 3K PLN for cells, 2k PLN for inverters and 3 k PLN for installation = 8k PLN, you can calculate how much return you get by dividing the FIT payment of 912.5 KWhr by 8K PLN. A 2.5KW or 4KW is more probable than 1KW.

Is there a demand for photovoltaic inverters in Poland?

As the photovoltaic market in Poland continues to evolve, the demand for inverters in the 20-150 kW range for commercial installations has largely been met with improved availability. However, as mentioned earlier, the market still experiences shortages of inverters above 200 kW, which can result in waiting times of over a year.

Who can apply for a photovoltaic installation in Poland?

The program is dedicated to households in Poland. Only domestic persons generating electricity for their own needs can become beneficiaries. You can apply for the program even if you purchased the installation after February 1, 2020. This means that you can qualify for the costs already incurred for a photovoltaic installation.
