

# A shade greener Bouvet Island

Is Bouvet Island a UNESCO World Heritage Site?

Through an accident of history, related to whaling, Bouvet Island is now a Norwegian possession. You wouldn't have guessed, although the climate does provide a hint. It is a UNESCO world heritage site, an honour it shares with Mount Etna, the Hawaiian and the Kamchatka's volcanoes. But you will be hard-pressed to find the visitor centre.

Does Bouvet Island have a website?

Bouvet Island now has a registered internet domain, .bv. However, this domain has no known web sites. The Mid-Atlantic Ridge (MAR), where the oceanic crust of the Atlantic Ocean is formed, runs from Iceland southward, ending at the Southern Ocean.

Is Bouvet Island a good place to start a restaurant?

Bouvet Island would be a good place to site the Restaurant at the End of the World. It meets all requirements, including a total lack of other customers. The main menu will be penguin omelet with an algae side dish, and the fumaroles provide just enough heat for the hot plate.

Which country is closest to Bouvet Island?

The closest continental landmass to Bouvet Island, other than Antarctica, is Africa, as the coast of South Africa is located almost 2,600 km to the northeast. Bouvet Island has an area of just 49 km<sup>2</sup>, 93% of which is covered in ice, while a few tiny rocky islets and skerries surround the main island.

How did Bouvet Island become a dependency?

The expedition carried out aerial photography of the island and was the first Antarctic expedition to use aircraft. : 64 The Dependency Act, passed by the Parliament of Norway on 27 February 1930, established Bouvet Island as a Norwegian dependency, along with Peter I Island and Queen Maud Land.

What is Bouvet Island famous for?

Bouvet Island has legendary status among ham radio enthusiasts. One of the ultimate achievements is to record worldwide contacts from this extreme location. The first to achieve this aim was Gus Browning in 1962, and the best-known ham operator here was Chuck Brady, who worked at a research station from December to early March in 2000/2001.
