An advanced distribution management system (ADMS) is a software platform that supports the full suite of distribution management and optimization. An ADMS includes functions that automate outage restoration and optimize the performance of the distribution grid.

NREL's advanced distribution management system (ADMS) research helps utilities meet customer expectations of reliability, power quality, renewable energy use, data security, and resilience to natural disasters and other threats.

Le système de gestion avancée de la distribution de Schneider Electric, EcoStruxure(TM) ADMS, utilise l'analyse avancée du DMS pour optimiser les opérations de réseau.
