

How much money is spent on energy in Afghanistan?

Afghanistan is seeking to rebuild and modernize its energy sector, and with the support of the international community, the country has made providing energy to its population a focus of its development efforts. Since 2002, more than \$4 billion has been spent on Afghanistan's power infrastructure and electrification (SIGAR, 2016a).

Why is Afghanistan's energy sector unable to stand on its own?

This circumstance results from the lack of a unified development agenda for Afghanistan's energy sector and the fragmented nature of decision-making and project implementation. After fifteen years of sincere, robust effort, the energy sector remains unable to stand on its own.

Who supports Afghanistan's energy sector?

In addition to domestic agencies, there are numerous foreign funders and development partners that work with the government of Afghanistan. The US government, particularly USAID and the Army Corps of Engineers (ACE), have had a significant role in the country's energy sector.

Does Afghanistan have solar power?

Besides, solar energy accounts for over two-thirds of Afghanistan's total renewable energy potential of over 300,000 megawatts (MW). Given its approximately three hundred sunny days per year, Afghanistan is well-positioned to harness solar power. Afghanistan's solar energy potential is comparable to that of four sunbelt states in the United States.

How important is private sector participation in Afghanistan's energy sector?

One important factor that stakeholders in the energy sector agree upon is the importance of the participation of the private sector in developing and enhancing the energy sector of Afghanistan.

Does Afghanistan have a power sector?

In Afghanistan, the power sector is one of the least developed ones, and its inadequate status is preventing the development of the country. The access ratio is one of the lowest in the world (about 6%), with only 340,000 clients connected to the civic power network, of which more are in the Kabul region.
