What is agrivoltaic agriculture?

Agrivoltaics refers to agricultural production among solar arrays. At our projects, we produce two crops on one piece of land - renewable solar energy and pasture-raised lamb. The livestock are managed intentionally to restore our project sites to functioning grassland ecosystems.

What are agrivoltaic projects?

Agrivoltaic projects bring together farms and solar energy production. Photovoltaic panels can sit atop fields of forage grasses for livestock, such as these sheep. Have feedback on the audio version of this story? Let us know!

What is Silicon Ranch's agrivoltaics?

Silicon Ranch's agrivoltaics is a utility-scale program that builds capacity to deliver Regenerative Energy and restore ecosystems using the power of animal impact. The in-house operations and maintenance for this was launched at the Ranch in 2021.

Can agrivoltaic projects benefit farmers?

Agrivoltaic projects can benefit farmers by giving them a second crop: electric power. Or, farmers can pick up some extra cash by leasing their land to power companies that will install their own solar panels on the site. Although the idea behind agrivoltaics has been around for decades, interest among farmers has picked up only recently.

Should agrivoltaic planners put solar over a farm?

Or farm first, and put solar over it?" If farming is the main priority, she says, then the solar panels may need to be spaced farther apart and possibly be raised higher. Such changes could potentially limit how much electricity those farm fields generate. And agrivoltaic planners may need to treat the soil, Macknick says.

Are We the first agrivoltaic CSA in the country?

"We're the first agrivoltaic CSA in the country," Jackson boasts. According to a recent NREL report, the United States would need about 4 million hectares (10 million acres) of solar panels to meet the country's demand for electricity. That's a lot of land -- about half the size of the state of South Carolina.

Massachusetts has enacted a feed-in tariff adder of \$0.06/kWh for agrivoltaic projects through its Solar Massachusetts Renewable Target (SMART) program. New Jersey authorized an agrivoltaics pilot program of up to 200 MW on unpreserved farmland and funded an R&D system at the Rutgers New Jersey Agricultural Experiment Station. Colorado has also ...

Silicon Ranch deployed an agrivoltaic model it calls Regenerative Energy at the Clay Solar Project, which was developed after White Oak Pastures owner, Will Harris, introduced Silicon Ranch leadership to the ...

## Agrivoltaic companies Georgia
