

Does Albania have a hydro power plant?

Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable. The total installed generation capacity has increased over the last few years because of new private investments in hydro power plants and more recently in small solar farms.

What is AEA-Albania Energy Association?

AEA-Albania Energy Association is a not-for-profit industry association, established in 2011 to represent albanian and international energy producers, consumers and promote the use of sustainable energy in Albania and Europe. Identification number (NUIIS): L11827451K Place of registration: Tirana Court, Decision 3032.

Does Albania have a power supply security problem?

Albania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable.
