

Will Algeria build a solar PV plant?

The state owned utility for electricity and natural gas distribution in Algeria has signed 19 contracts with local and international companies to construct solar PV plants. In making the announcement recently, the government said the project to produce 3,000MW of solar PV energy is part of its Renewable Energy Development Programme.

Where are solar panels produced in Algeria?

There are factories producing solar panels in Boukherana industrial zone, and the province of Ouargla. Algeria's renewable energy potential is enormous, mostly focused on solar. Some 60 solar photovoltaic plants, concentrated solar power plants and wind farms as well as hybrid power plants are planned.

Are solar panels a good investment in Algeria?

Investors must meet some local content requirements, including using equipment manufactured in Algeria, largely solar panel and assembly structures. There are factories producing solar panels in Boukherana industrial zone, and the province of Ouargla. Algeria's renewable energy potential is enormous, mostly focused on solar.

How much solar power does Algeria have?

By the end of 2023, Algeria had 437 MW of solar generation capacity, according to the national Commission for Renewable Energies and Energy Efficiency (CEREFEE). The country has an average of 3,000 hours of sunshine per year and global horizontal irradiation of almost 1,700 kWh/m<sup>2</sup>/year in the north and 2,263 kWh/m<sup>2</sup>/year in the south.

Who will fund solar projects in Algeria?

The Algeria government is to fund the solar projects. Sonelgaz has signed 19 contracts with local and international companies to construct solar PV plants across Algeria.

Can Algeria achieve 15,000 MWp of solar energy by 2035?

To diversify its energy mix, largely dominated by gas and oil, Algeria wants to achieve 15,000 MWp of solar energy by 2035. A call for tenders is underway to install solar power plants in several regions. The region of Laghouat is at the forefront of this conversion: solar kits have been distributed to remote villages and to nomadic populations.

For its first edition and for two days, Algeria Solar Summit 2022, annual event, will bring together all the leaders and major players in the field of solar energy in Algeria. It translates and supports the ambition and commitment of Algeria ...

The Government of Algeria sees ideal opportunities of combining Algeria's richest fossil energy source - the

## Algeria solar energy banks

natural gas - with Algeria's most abundant renewable energy source - the sun - by integrating concentrating solar power into ...

In making the announcement recently, the government said the project to produce 3,000MW of solar PV energy is part of its Renewable Energy Development Programme. The first component is a 2,000MW project that ...

Algeria's National Electricity and Gas company (Sonelgaz), through its subsidiary Sonelgaz-EnR, has just signed concession agreements with several local and transnational companies for the financing, construction ...

Algeria's renewable energy potential is enormous, mostly focused on solar. Some 60 solar photovoltaic plants, concentrated solar power plants and wind farms as well as hybrid power plants are planned. Because of ...
