

Alstom power grid Martinique

Is Alstom a good company?

Alstom is a global leader in the world of power generation, power transmission and rail infrastructure and sets the benchmark for innovative and environmentally friendly technologies. The Group employs 93,000 people in 100 countries and had sales of €22.162 billion in 2012/13.

Will Alstom buy Bombardier?

The deal required the approval by Alstom shareholders at a meeting to be held in October 2020 and approval by European regulators. Bombardier's major shareholder, Caisse de dépôt et placement du Québec, had already agreed to the sale. In July 2020, it was announced that the EU competition authorities had approved the purchase.

Is Alstom still a popular power source?

While the coal power market, in which Alstom still packs significant punch when compared with the decline it has experienced in its gas turbine operations, is under threat from the shift towards more environmentally friendly fuel sources, it remains a popular power source, particularly in emerging markets.

Will GE buy Alstom?

Siemens is the second largest player in the gas turbine market behind GE. While GE dominates its domestic market, Siemens has a far larger share of the European market. The acquisition of Alstom by GE could significantly shift that balance of power. The US Environmental Protection Agency has been accused of 'waging a war' on coal.

What happened to Alstom & Bombardier?

To finish the deal, Alstom had to sell the Alstom DDF factory based in France, a regional train division, a Bombardier facility in Germany, and a Bombardier trains division. The company also had to provide guarantees and pass on some of Bombardier's assets.

In 2014, General Electric (GE) announced that it reached a deal to purchase Alstom's power and grid divisions for US\$17 billion (€12.4 billion). The deal came under heavy scrutiny from French regulators who saw the business as a strategically important domestic industry.

Alstom Power, anciennement ABB-Alstom Power, était l'une des deux branches des activités de la multinationale française Alstom, avant son rachat par l'américain General Electric avec Alstom Grid en 2015. Aujourd'hui, les activités nucléaires sont aujourd'hui regroupées au sein d'Arabelle Solutions, une filiale d'EDF, et les autres sont conservées par GE, pour être regroupées...

The Grand Port Maritime de La Martinique (GPMLM), as a major logistics tool through which most of the island's containerised maritime traffic transits, is also undertaking an energy transition. In particular, it has decided to implement a programme called "Smartgrid Pointe des Grives", aimed to supply electricity to ships at quayside.

In addition to the gas turbine business going to GE, the US company will also take a 50% share in three joint ventures with Alstom covering renewable, power grid and nuclear technologies.

Le développement des énergies renouvelables locales en Martinique est un enjeu essentiel. Solaire, éolien, biomasse... autant de solutions qui permettront au territoire de devenir indépendant sur le plan énergétique et aux Martiniquais ...

Alstom Grid, one of four Alstom sectors, has over 100 years of expertise in electrical grids. Whether for utilities or electro-intensive industries or facilitating the trading of energy, Alstom Grid brings power to its customers' projects.
