What is the American-made Energy Storage Innovations prize?

WASHINGTON, D.C. -- The U.S. Department of Energy's (DOE) Office of Electricity (OE) today announced the ten winners of the inaugural American-Made Energy Storage Innovations Prize. The American-Made Challenge calls for solutions to grid-scale energy storage. The prize is \$300,000.

What is the future of energy storage?

Storage enables electricity systems to remain in balance despite variations in wind and solar availability, allowing for cost-effective deep decarbonization while maintaining reliability. The Future of Energy Storage report is an essential analysis of this key component in decarbonizing our energy infrastructure and combating climate change.

What is the Energy Storage Innovations prize?

The Energy Storage Innovations prize also supports the Energy Storage Grand Challenge and Long Duration Storage Shot. These initiatives aim to reduce by 2030 the cost of grid-scale energy storage by 90% for systems that deliver 10 or more hours of electricity.

Why do we need a co-optimized energy storage system?

The need to co-optimize storage with other elements of the electricity system, coupled with uncertain climate change impacts on demand and supply, necessitate advances in analytical tools to reliably and efficiently plan, operate, and regulate power systems of the future.

Why is energy storage important?

Energy storage is a potential substitute for, or complement to, almost every aspect of a power system, including generation, transmission, and demand flexibility. Storage should be co-optimized with clean generation, transmission systems, and strategies to reward consumers for making their electricity use more flexible.
