

How much does energy cost in Guadeloupe?

Energy Snapshot Guadeloupe This profile provides a snapshot of the energy landscape of Guadeloupe, an overseas region of France located in the eastern Caribbean Sea. Guadeloupe's utility rates are approximately \$0.18 U.S. dollars (USD) per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33 USD/kWh.

Does Guadeloupe rely on imported fuels?

Nevertheless, Guadeloupe's reliance on imported fossil fuels--more than half of the island's electricity is generated from imported petroleum-based fuels--leaves it vulnerable to significant disruptions in shipping or the availability of import facilities.

Is Guadeloupe a renewable country?

Guadeloupe has a large portfolio of renewable generating capacity, with 112.8 MW installed as of 2013. It also has a diverse portfolio, both in terms of generation types and facility ownership.

While an Organic Rankin Cycle (ORC) system can utilize lower quality energy streams to also generate power. Industrial waste heat for power is largely an under-utilized type of combined heat and power (CHP) which allows for both power generation and thermal energy for other processes

Heat pipes utilize evaporative cooling to transfer thermal energy from one end of the evacuated and hermetically sealed pipe to another by a two phase operation of a working fluid. This process offers a great number of advantages and benefits.

Parce que nos métiers sont au coeur de votre entreprise, AMS est présente dans les trois départements, Martinique, Guadeloupe et Guyane, avec l'ambition d'apporter ses clients des solutions globales, dans le respect des valeurs portées par notre Groupe.

Permettre la Guadeloupe de progresser vers l'indépendance énergétique vis-à-vis des énergies fossiles, c'est un défi que nous avons le devoir de relever pour les générations futures.
