

What are the 10 energy communities in Andorra?

This is another step towards the digitalisation of the area surrounding Andorra together with the development of 10 energy communities. These are Andorra, Híjar, Albalate del Arzobispo, Puebla de Híjar, Jatiel, Castelnou, Ejulve, Molinos, Alacón and Alcorisa.

What services does Andorra Solutions offer?

Andorra Solutions offers services such as company formation, tax advisory, international tax planning, and personal residences as well as relocation services. Andorra Solutions will accompany you in each step. Andorra has a very attractive taxation with significantly lower tax rates compared to other European countries.

What is the Endesa plan for Andorra?

For Endesa's General Manager for Sustainability, María Malaxechevarría, this Endesa plan for Andorra "is not just theory, it is a reality with which more than 30 entities in the area have collaborated with innovative and unique projects, which aim to generate employment by helping to diversify the economy in the surrounding area.

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

Endesa, through its renewable subsidiary Enel Green Power Spain, has been the provisional winner of the fair transition tender in Andorra, obtaining the right to connect 953 MW and the option to confirm up to 1,200 total MW.

The new renewable plants will be located in Albalate del Arzobispo, Híjar, Samper de Calanda-Castelnou, Andorra, Calanda, Alcañiz, La Puebla de Híjar, Jatiel and Alcorisa. We will also develop two battery storage plants that aim to fully exploit renewable energy production, reducing energy loss and optimising its use.

The new renewable plants will be located in Albalate del Arzobispo, Híjar, Samper de Calanda-Castelnou, Andorra, Calanda, Alcañiz, La Puebla de Híjar, Jatiel and Alcorisa. We will also develop two battery storage plants that aim to fully ...

It was home to a 1GW lignite thermal power plant which Endesa closed in 2020, called Teruel, the name of the province it and Andorra are both in. The proposed project will combine wind, solar, battery energy storage ...

Endesa will build five solar plants and five wind plants supported by a battery energy storage system. The

latter "will make it possible to make the most of renewable production", indicating it will charge and store surplus energy generated by the resources.

The Future Plan for Andorra, a benchmark for good practices in energy transition processes, is an initiative to replace the 1,100 MW at the coal plant in Teruel province with 1,725 MW of renewable energy, plus 160 MW of storage.

Andorra will go from producing energy using coal, to generating clean energy with an installed capacity of 1,843.6 MW as a result of 7 hybridised renewable projects, 2 storage projects with batteries, a green hydrogen project and a synchronous compensator.

This plan includes the development of 10 energy communities, including Andorra and surrounding towns, where self-consumption solar plants will be installed on 40 public sites. These plants, are expected to provide electricity to 3,800 beneficiaries, promoting autonomy and energy efficiency.
