

B2b energy solutions Curaçao

How will a battery energy storage system benefit Curaçao?

The implementation of a Battery Energy Storage System will allow Curaçao to collect energy from renewable sources such as wind and solar energy and store it using advanced battery storage technologies. This stored energy can be released to mitigate the intermittency of wind power and ensure grid stability.

How Aqualectra is promoting green energy in Curacao?

Aqualectra is promoting the use of green energy in Curacao by already supporting schools to install solar panels on their roofs. Currently, 23 percent of Aqualectra's power supply is green, and the company aims for a total of 50 percent by 2020.

How can Curacao's future be developed?

One way to develop Curacao's future and decrease the use of polluting fossil fuels is to introduce, facilitate, and stimulate the usage of electric cars. Aqualectra is planning to increase its current vehicle fleet from two to six electric cars.

The implementation of a Battery Energy Storage System will allow Curaçao to collect energy from renewable sources such as wind and solar energy and store it using advanced battery storage technologies. This stored ...

Several of the company's long lasting projects involving green energy, smart meters, electric cars, and moving out of the city's center are outlining, shaping, if not developing Curacao's economy and future.
