Will a 10MW / 20mwh battery energy storage system be built in Belgium?

Image: Fluence. A 10MW / 20MWh battery energy storage project in Belgium has achieved financial close and is expected to begin construction shortly, the consortium behind the project has said. The lithium-ion battery energy storage system (BESS) will be built in the town of Bastogne in Belgium's southern Wallonia region.

What is a portable energy storage system?

Energy Storage Systems can be a costly, space consuming and manhour intensive item to install and maintain. For many consumers, it becomes an out of budget inconvenience, so portable ESS devices are designed allow for an easy transition to backup power.

Is Belgium a potential market for energy storage?

In a June interview with Energy-Storage.news Belgium was identified as one of Europe's most attractive potential markets for energy storage, according to Michael Salomon, CEO of energy storage consultancy firm Clean Horizon. The Estor-Lux 10MW /20MWh system is thought to be the largest in the country.

What is the largest European battery-based energy storage project?

In May 2023, we launched our largest European battery-based energy storage project at the Antwerp platform in Belgium. With its 40 containers, the site will develop a capacity of 75 MWh, which is equivalent to the daily consumption of almost 10,000 homes.

How does ESS work?

Three years later and all the ESS facilities have been installed and connected to absorb or inject energy in line with the needs of the power grid. The entire system is operated from a single control station with the ability to deploy the 129 MW all at once if needed.

Why is ESS important?

Large-scale ESS systems are vital for promoting the growth of renewables and enabling them to represent a major proportion of the electricity mix. TotalEnergies is developing several projects in this area with the objective of: allowing more renewable electricity to be injected into the grid. How Can Electricity Be Stored With Batteries?
