Solar Panels: Convert sunlight into direct current (DC) electricity. DC Water Pump: Uses the DC electricity generated by the solar panels to pump water from a source (e.g., well, river) to the fields. Built-in Controller: Regulates the power supplied to the water pump, ensuring efficient operation and protection from electrical issues.

Solar PV panel arrays convert the free energy from the photons in sunlight into electrical power. With a custom-designed PV system by Solar Heat and Cool, your home, office or commercial property can benefit from clean energy, self-sufficiency and an instant reduction in energy costs.

We design, supply and install solar technology across Stann Creek and southern Belize. From Caye to jungle retreat, Solar Heat and Cool can create systems that power your entire home, heat your water or cool your
