

Does Leclanche offer a battery energy storage system?

Leclanche will also be providing the battery energy storage system (BESS) for the on-shore recharging system for the Damen ferries. This turnkey approach offers significant benefits to future shipbuilders, ports and harbor authorities seeking a frictionless way to accommodate these state-of-the-art vessels.

Will Leclanche build a fully electric ferry?

Leclanche is partnering with Dutch shipbuilding group Damen to build the battery storage systems for two passenger/car ferries that will be the first in North America with the ability to operate fully electric with propulsion systems powered by batteries of 1.9MWh and 4.6MWh capacity respectively.

Who is Leclanche stationary solutions?

Leclanche Stationary Solutions business group provides substantial benefits to grid operators, utilities and corporate and commercial energy users. The Company operates through three standalone business units: eTransport Solutions, Stationary Solutions and Specialty Battery Systems.

How does Leclanche support e-transport solutions?

They are supported by a lean and efficient corporate central team. Leclanche's e-Transport Solutions team powers the electrification of transport (trains, vessels, trucks and more) through efficient, proven and reliable energy storage solutions. This group creates custom low-voltage battery systems for a wide range of demanding applications.

How does Leclanche work?

Leclanche's 2.35MWh capacity batteries are configured for the 800-passenger vessel's operation while in port without using main engines. The energy storage system is charged from shore power, which is also used for the vessel's other power needs during its stay in harbor.

How does the Leclanche EMS system work?

The Leclanche EMS system automatically activates to detect and suppress a fire in the batteries, preventing it from spreading to the cells. It can also be manually activated by first responders or automatically triggered by internal safety features and battery anomalies detected by the Leclanche EMS.

Leclanche provides complete electrical energy storage system (EESS) and energy management systems (EMS) for a wide range of customers and applications, including microgrids and EV fast charging stations. In our installation of 130 MWh of projects in a wide range of environments worldwide, we too have experienced the

Construction has begun on a solar-plus-storage project on the Caribbean island of St. Kitts & Nevis, backed by Leclanche, Solrid and MPC Energy Solutions. The launch of the SOLEC power plant is nearly 18 months later than expected with the start of construction first announced back in December 2020, covered by Energy-Storage.news.

As a turnkey Engineering, Procurement and Construction (EPC) provider, we supply grid-connected Electrical Energy Storage Systems (EESS) with our proprietary energy management software to provide ancillary grid services such as frequency regulation and spinning reserve in order to improve the stability and resiliency of the grid.

Leclanche Renewable + Storage systems allow customers to confidently incorporate renewable generation into their energy resources and integrate them directly using Leclanche's smart EMS software. These scalable solutions enable the customers to increase their renewable share without the typical concerns over intermittent solar ramp rates ...

Leclanche provides complete electrical energy storage system (EESS) and energy management systems (EMS) for a wide range of customers and applications, including microgrids and EV ...

Swiss energy storage company Leclanche has broken ground on a US\$70 million solar and storage microgrid project in St Kitts and Nevis. The system will include a 35.7MW solar farm and a 14.8MW lithium-ion battery energy storage system (BESS) with a capacity of 45.5MWh, providing state-owned utility St Kitts Electric Company (SKELEC) with ...

Leclanche is partnering with Dutch shipbuilding group Damen to build the battery storage systems for two passenger/car ferries that will be the first in North America with the ability to operate fully electric with propulsion ...
