

Welcome to BING Power Systems GmbH - your specialist for engine components. For more than 85 years our products have been used all over the world in the field of mixture formation for engines.

BING is a development supplier for automobile, motorcycle and engine manufacturers worldwide. Innovative products, manufacturing with high productivity, on-schedule delivery, sustainability and last but not least permanent quality improvement are our strengths.

Products/services: Throttle bodies for injection systems; Fuel pumps; Turned parts of steel and metal. Profile turned parts; Exhaust gas emission measurement; Exhaust throttle valves; Oil spray jets for piston cooling; Fuel Rails (CNG, gasoline) Carburetor jets.

For over 85 years, our products are used around the world, when it comes to the fuel systems for engines. Initially focused on carbs for the bicycle industry and for small engines, our traditional company evolved and has since made a name for itself as an innovative automotive supplier.

In 2015, Bing Power Systems was majority acquired by an Indian investor, Flash Group. In 2017 the partner, Joachim Prei, was dismissed as managing director and at the end of the same year he gave up the remaining shares in the company.

Our know-how from carburetor manufacturing has been implemented in the development and manufacture of systems for fuel injection throttles. In addition, we now also supply fuel-conducting engine components. Thus the BING family counts a large variety of ...
