

Bonaire Sint Eustatius and Saba twice battery analytics platform

What is twice battery analytics platform?

The TWAICE Battery Analytics Platform is a convergence of deep battery knowledge, artificial intelligence (AI), scalable cloud software, and real-life battery data. It creates a single source of truth for how batteries should be effectively developed and operated--simple, low-cost, and high-value.

What is viricity's new battery technology partnership?

A new joint venture between battery technology company TWAICE and telematics firm ViriCity aims to combine clean battery technology with analytical insights to monitor the health and operating capacity of bus batteries as they are being used.

What is a battery analytics software platform?

Michael Baumann: The product in the end is a battery analytics software platform, which we are building out--it addresses the whole life cycle of batteries, and can be used by different industries. This platform has different solutions, and these solutions can be very specific.

What does twice do with used EV batteries?

TWAICE is also working with TÜV Rheinland (Technical Inspection Association, a network of companies in Germany and Austria that test, inspect and certify technical systems, roughly similar to UL or Intertek) to build a test and certification system for used EV batteries.

Will viricity's 'twice battery monitoring' help the clean transport sector?

As TWAICE battery monitoring is currently available as an add-on feature to ViriCity's fleet management dashboard, the two partners are confident that the project could help make the clean transport sector more efficient and financially viable in the near future.
