

ENGIE Energy Access Zambia offers expandable solar home systems, providing lighting, phone charging, TV, radio and more, financed through affordable instalments via mobile money (MTN). We enable those seeking clean, off-grid energy to access both power upgrades and other life-changing loans.

How to calculate solar price per watt. Calculating the price per watt for a solar system is very straightforward -- it's simply the system cost divided by the number of watts in the system. ...

In Zambia, MySol (a brand under ENGIE Energy Access) offers a range of solar home systems to provide off-grid electricity solutions. These systems are designed for households and small businesses, especially in areas with limited access to grid power.

The MySol Boss is all-in-one standalone solar energy system of 3kW, 5kW or 8kW capacity. Our tailor-made green energy solution tackles the energy obstacles faced by households, institutions, and small businesses lacking grid access or those dependent on generators.

Bothered by, or tired of bathing, washing and cleaning with ice-freezing cold water right from your water tap, MySol solar water heaters are now available at discounted prices and on interest free loans for all Rwandans.

"The new MySol Boss solar energy system will enable customers to have access to clean and cheaper energy. The product will be purchased on cash or on loan of up to 36 months under a favorable repayment plan as it is the case for other MySol products". said Patrick Mugabo, Head of Operations at Engie Energy Access Rwanda.

How to calculate solar price per watt. Calculating the price per watt for a solar system is very straightforward -- it's simply the system cost divided by the number of watts in the system. Price per watt (\$/W) allows for an apples-to-apples comparison of different solar quotes that may vary in total wattage, solar panel brands, etc.

From basic solar lighting kits to mini-grids powering villages, we deliver the benefits of solar energy to meet customers where they are. We help them climb the energy ladder through fair pricing plans paid in installments via mobile money.
