system (HGS), liquid hydrogen vessels, hydrogen pressurization, and hydrogen supply system for vehicles.

At Broaden Energy, we are dedicated to leading this transition by ensuring our renewable energy projects not only meet environmental standards but also enhance and restore biodiversity, creating lasting value for both nature and society.

Additional notes: Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. The value of energy trade has been defined as including all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation has been calculated as annual generation divided by capacity x 8,760.
