

How much energy does Burundi use?

Energy in Burundi is a growing industry with tremendous potential. As of 2020, Burundi consumes a total of 382.70 million kilowatt hours (kWh) of electric energy per year. The country produces locally 69% of the electricity it consumes, with the rest imported from other countries.

Who is Inkia Energy?

Today, Inkia Energy maintains assets in nine countries across South America, and is responsible for the generation, transmission and distribution of electrical power for more than two million customers, all under Willem's directive.

What are the energy planning strategies for Burundi?

Energy Planning Strategies for Burundi The Burundian energy supply highly depends on traditional use of biomass. The literature shows that the power supply of this country mainly relies on hydropower generation. Many hydropower projects are under development to increase the electricity access of this country .

What is Burundi's main energy source?

Its most important power source is hydroelectric power, representing 95% of total production. It also uses energy from other renewable (wind, solar, biomass, and geothermal) and coal power plants. Burundi has the world's lowest carbon footprint per capita at 0.027 tons per capita in CO₂ emissions as of 2019.

Why is energy demand increasing in Burundi?

Limited capability and resources to improve energy efficiency are also the main factors contributing to the increase of Burundian energy demand. Incorporating these factors into energy demand forecasts is crucial for a capital constrained developing country, like Burundi, where reliable energy supply capability is limited. 4.2.

What will become the Burundian power sector in long-run?

Although the country is endowed with a huge potential for various energy resources , there is higher uncertainty about what will become the Burundian power sector in long-run. This uncertainty is higher as the target of reaching 30% of electrification rate in 2030 is still far from the current situation (Fig. 2).

Burundi: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...
