

Canada off grid power systems

Is off-grid solar illegal in Canada?

No, off-grid solar is not illegal in Canada. In fact, Canada is one of the leading countries in the world when it comes to renewable energy, and many homeowners across the country have installed solar panels to generate their own electricity and live off-grid.

What is an off-grid power system?

First, we'll have a look at the multiple parts of an off-grid system so you see how it all comes together. An off-grid power system (aka standalone power system) operates independently of the main electrical grid to provide energy. It includes several components that generate, store, regulate and distribute electricity.

What is an off-grid Solar System?

Our off-grid solar systems are an environmentally friendly option for generating power. By using renewable energy sources like solar power, you can reduce your carbon footprint and contribute to a more sustainable future. Our off-grid solar systems are a cost-effective option for generating power in remote locations.
