In a cardiac emergency, a portable electronic device known as an automated external defibrillator (AED) can be a lifesaver. A defibrillator (Figure (PageIndex{2})) delivers a large charge in a short burst, or a shock, to a person's heart to correct abnormal heart rhythm (an arrhythmia). A heart attack can arise from the onset of fast, irregular beating of the heart--called cardiac or ...

Among Carnot batteries technologies such as compressed air energy storage (CAES) [5], Rankine or Brayton heat engines [6] and pumped thermal energy storage (PTES) [7], the liquid air energy storage (LAES) technology is nowadays gaining significant momentum in literature [8]. An important benefit of LAES technology is that it uses mostly mature, easy-to ...
