

Swiss Battery is committed to the promotion and development of modern battery technologies, especially for electromobility (e-mobility), for aviation and Mobility 4.0, the development of which has a lot of catching up to do in Europe.

Product types: Industrial Batteries, Military Batteries, Telecommunication Batteries, Primary Batteries, Alkaline Batteries, Rechargeable Batteries, Battery Chargers, DC to AC power inverters, rechargeable batteries, deep-cycle batteries. Service types: Integration of customized battery and charging systems, production of Li-ion cells

Ensures the competitiveness of the Swiss Industry in the field of Battery Applications & Technologies Our Mission Batteries are the key enabler for emission-free mobility, renewable based energy systems, advanced robotics ...

Ensures the competitiveness of the Swiss Industry in the field of Battery Applications & Technologies Our Mission Batteries are the key enabler for emission-free mobility, renewable based energy systems, advanced robotics and mobile medical equipment.

At Redux Energy, we develop state-of-the-art energy storage solutions, based on the safest, most thermally stable type of lithium batteries: Lithium-Ferro(Iron)-Phosphate (LiFePO_4). The core of the system is driven by a BatteryManagementSystem (BMS), which ensures the safe operation and long life of our batteries.

Swiss Battery"s rechargeable patent-pending swiss batteries employing a cathode-material and chemical-substitution strategy, avoiding the use of toxic heavy-metals. The high performing swiss batteries are made from abundant sources, which can overcome the issue of i) raw material shortage and ii) high risk international dependencies.

At Redux Energy, we develop state-of-the-art energy storage solutions, based on the safest, most thermally stable type of lithium batteries: Lithium-Ferro(Iron)-Phosphate (LiFePO_4). The core of the system is driven by a ...
