

Cuba sungold solar panels

Is Cuba wasting solar energy?

The opportunity now for individuals to import their own photovoltaic systems to Cuba, may change this situation. With just 20,000 solar water heaters and a million kWh every day of energy installed in its photovoltaic parks, Cuba is basically wasting the vast majority of the solar energy it has available. Read more from Cuba here on Havana Times.

What services does Sungold solar offer?

At Sungold Solar, we offer a comprehensive range of services designed to meet the growing demand for solar energy solutions: We specialize in producing high-quality solar panels, including glass laminated modules, semi-flexible panels, and portable folding modules.

Should Cuba have a photovoltaic system?

The first of these two proposals seems to be the most attractive for Cubans with the means to do so. With today's photovoltaic technologies, any Cuban house can in theory satisfy its own electricity needs, as well as that of neighboring residences.

How many solar panels does Sungold offer?

Sungold provides 6 pieces of 120W all-black flexible solar panels with 600W micro-inverter to meet customer's needs. The solar panels are made of shingle solar cells, which can be used in two strings and two parallels to keep the voltage at 36.5v to meet customer's requirement.
