

Technology group W&#228;rtil&#228; will supply the Caribbean island of Curaçao with a 25 MW / 25 MWh Battery Energy Storage System (BESS). The system will enable the expansion of renewable energy capacity and the reduction of carbon emissions, representing an important step towards a sustainable energy future for the island.

The BESS will enable Aquallectra to add more renewables to the power system, help smooth their intermittent nature and provide grid stability. According to Aquallectra's 2022 annual report, the last one available on its website, wind and solar accounted for more than 32% of Curacao's electricity demand that year.

Technology group W&#228;rtil&#228; will supply the Caribbean island of Curaçao with a 25 MW / 25 MWh Battery Energy Storage System (BESS). The system will enable the expansion of renewable energy capacity and the ...

The BESS and the GEMS Digital Energy Platform will provide grid stability and reliability, reduce unserved energy and help mitigate the risk of brownouts and blackouts. In addition, the BESS ...
