

How can electric vehicles be used in Cyprus?

The use of electric vehicles, combined with their charging from alternative energy sources, will make a significant contribution to the achievement of Cyprus' European objectives for green development. For the charging of an electric vehicle or plug-in hybrid vehicle, the applicant will: Installation/extension of a net-metering PV system.

How do you charge a Lexus 450h+ battery?

Plug-in Hybrids charge their lithium-ion battery using a cable attached to the car from a power source. Although the new Lexus NX 450h+ will plug into a normal home socket, a Lexus Wallbox is recommended to provide faster charging. It is simple and convenient to plug the new Lexus NX 450h+ into a normal socket at home.

How to charge an electric vehicle or plug-in hybrid vehicle?

For the charging of an electric vehicle or plug-in hybrid vehicle, the applicant will: Installation/extension of a net-metering PV system. Installation of an electricity meter used for charging the vehicle. Installation of a charging point (optional).
