

Cyprus novali energy

What is a Novali battery?

novali's high voltage lithium-metal batteries provide breakthrough performance in charging speed, range, sustainability and cost efficiency. novali engineers and builds customized battery systems for mobility and stationary storage applications Let's share some energy!

How do I contact Novali energy?

Contact us Vaartdijk 22,3150 Tildonk,Belgium +32 472 693 854 info@novali.energy Contact us Name Email Address Phone number Company Message Thank you! Your message has been send. Oops! Something went wrong while submitting the form. Our office Vaartdijk 223250 Tildonk Belgium Contact info info@novali.energy +32 472 693 854 Cutting edge cell technology

Why should you choose Novali lithium-metal batteries?

Contact us novali's high voltage lithium-metal batteries provide breakthrough performance in charging speed, range, sustainability and cost efficiency Our Technology Material stack

Are Novali batteries safe?

We never compromise on safety. All novali technology is built with the highest safety standards in mind We offer a range of battery cell technology fit for purpose and available in different form factors. We know that cost is a key driver for your project. We use unique battery chemistries to provide competitive prices

Why should you choose Novali?

All novali technology is built with the highest safety standards in mind We offer a range of battery cell technology fit for purpose and available in different form factors. Why are Novali battery cells better than solid-state batteries?

In addition, our cells offer enhanced safety and sustainability characteristics. When compared to solid-state batteries, novali battery cells out-compete on charging speed and cost.

The signed memorandum of understanding between Belgium based battery company Novali and industrial automation solution supplier Mitsubishi Electric Europe B.V. demonstrates quite how soon that agreement ...

Cyprus: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Cyprus, with its 648 km coastline and a high coastal population (90%), boasts significant potential for wave

Cyprus novali energy

energy generation. The island nation harnesses an average wave energy density of 12.5 kW/m, translating to a ...
