Devil fruit that can store electricity

coding this new electricity system for my unreleased mod.

Ah, the Nikyu Nikyu no Mi (Paw Paw fruit) is terribly Over Powered. The only thing I can see actually countering it would be Teach's Yami Yami no Mi and grabbing him to nullify his DF. The Paw Paw fruit repels not just physical but abstract as well. So in theory, he can block/repel any attack thrown at him with his hands.

This Paramecia Type Devil Fruit that allows its user to generate and store huge amounts of electricity, This makes them an Electrocution User. In-Depth Description: The User is basically ...

He can also store electricity in his tomoe drums, which he once used to restart his heart after Wyper's attacked forced it to stop beating. ... But what makes Crocodile truly terrifying is the fact that he can use his Devil Fruit powers to suck out moisture. He can turn anybody into a dried husk, while also being able to turn anything into sand

Can extract more info from things he touches and has overall stronger grip strength. another is the breath fruit. The user gets stronger and bigger lungs and can chug out big gust of winds from his mouth. Can store CO2 as a toxin gas and can condense nitrogen in his lungs to make it liquid and get a breeze breath.

This has to be an aspect of this arc, a full write up of the entire encyclopedia with all the Devil Fruits and their descriptions. Probably best to have it as a separate release like the Vivre cards or the Road to Raftel. We need proper explanations of Devil Fruit powers, especially since in the past, some of the explanations have been problematic.

Yeah, you get to choose one devil fruit. That's doesn't mean every single other devil fruit exists. ... laws fruit so i can steal food from the store Reply ... Logia, high speed, infinite electricity, superhuman reflexes und you could Raigo towns you don't like. It can also do the only medical thing Law's fruit can't : Restart his own heart ...

If Robin can create sentient clones and giant limbs, then there's really no telling what devil fruits can do with enough training. An even earlier example is Luffy being literally rubber, and immune to electricity; he isn't simply elastic. And even with extremely limited fruits like Foxy's effective range, there's still Awakening.

Devil fruit that can store electricity

The thing about Devil Fruits is that they are a fun system that bring in a lot of special powers with little needed explanation, but the author kind of realized that they could be a problem in the future, what with a certain class of Devil Fruit making the user basically invulnerable unless you have the natural counter to the element (like water against sand, or rubber against electricity),

The bomb devil fruit seems like a underrated one, a good user could literally have outstanding firepower, imagine throwing your self as bomb o do explosive punches and kicks, you could even propel yourself by blasting to the ground, use guns and make em shoot explosive projectiles, or you could explode yourself without even harming yourself since ...

Then I can think of things like the clothes clothes or food food fruits so that you just don't have to spend money on those things as much and will never really starve. The rumble rumble fruit could be wildly useful if you just sold the energy produced, but it's also super strong and that's just asking for government intervention.

The Biri Biri no Mi is a Paramecia-type Devil Fruit that allows the user to generate and store electricity within their body which allows them to use said energy for several electricity-based abilities, making the user an Electric Generator Human (?????, Kidenki Ningen? The fruit was eaten by Ramman Levi, and previously by Senden.
