

Dgrid lithium battery Mozambique

What is the Mozambique hard rock Lithium Project?

The Mozambique Hard Rock Lithium Project is in the grassroots phase and forms part of a 170 km long belt within the Alto Ligonha Pegmatite Field in northern Mozambique. It consists of 6 licences and the project area is known to contain several large sodalitic-type (LCT) pegmatites, which may contain lithium mineralisation.

What is the future of lithium mining in Africa?

While demand for this rare mineral crosses many industries, the largest demand is from the international battery sector, and this demand is expected to continue rising. Africa, with 18 lithium mining projects at varying stages of development, from grassroots to operational, will be a major player in meeting this long-term demand.

Which country has the largest lithium deposits in Africa?

Zimbabwe has the largest lithium deposits in Africa. Its two largest mines are: Bikita mine in the Masvingo province has reserves of 10.8 million tons of lithium ore and a lithium content of 150 000 tons (1.4%).

How many lithium mines are there in Africa?

There are currently 18 lithium projects in development on 18 operational mines spread across the continent, but limited to only eight countries. Zimbabwe has the largest lithium deposits in Africa. Its two largest mines are:

Will lithium demand continue to grow in 2027?

Research and consulting firm Roskill reports that longer term scenarios continue to show strong growth for lithium demand over the coming decade, with demand forecasted to exceed 1.0 Mt LCE (Lithium Carbonate Equivalent) in 2027, with growth in excess of 18% per year to 2030.

What is Kamola Lithium Project?

The grassroots Kamola Lithium Project is located within the Mid-Proterozoic Kibaran Belt, an intracratonic domain extending over 1 300 km through Katanga into southwest Uganda. The Manono Lithium Tin Project is in the feasibility phase and one of the largest rich Lithium Caesium Tantalum (LCT) pegmatite deposits in the world.

As global demand for battery metals continues to grow, the upcoming Critical Minerals Africa summit will showcase Africa's latest lithium development projects in Zimbabwe, Mozambique, Rwanda and more
