Where is El Salvador building its first solar energy plant?

Photo: CEL. San Salvador -- The state-owned and autonomous Comisión Ejecutiva Hidroeléctrica del Río Lempa (CEL) of El Salvador will build its first solar energy plant in the country, in the municipality of Talnique, in La Libertad department in the country's southwest, around 30km (18.5 miles) west of the Salvadoran capital.

What is El Salvador's first state-owned solar power project?

Salvadorean state-owned hydro power producer Comisión Ejecutiva Hidroeléctrica del Río Lempa (CEL) this week launched construction of a 17-MWp solar PV farm in the south-west part of El Salvador. The project has the distinction of being El Salvador's first state-owned solar power initiative -- from the design and planning to execution, CEL said.

Where is El Salvador's first solar park located?

Envisioned layout of the Talnique solar park in El Salvador. The state of El Salvador has started building the country's first publicly owned solar park. It is being installed in the municipality of Talnique, La Libertad department. It will have an installed capacity of 17 MW, with operations expected to start in December 2023.

When will El Salvador start building a solar park?

El Salvador's Lempa River Hydroelectric Executive Commission (CEL) has started building a 17 MW solar park. It is the first to be owned, designed, planned and executed by the national authorities. It is scheduled to start operations in December 2023. Envisioned layout of the Talnique solar park in El Salvador.

The new photovoltaic project, the second under the Bukele administration, aims to generate around 20 megawatts with solar panels installed on CEL's hydroelectric plant grounds. Álvarez confirmed that the project has received feasibility approval, and they are currently exploring financing options for its construction in the coming months.
