Who is elestor BV?

Elestor BV is a young, fast growing company, active in the development of industrial size storage systems for electricity, based on the hydrogen bromine flow battery principle.

Is elestor a good solution for energy transition?

With its unique system design, Elestor has matured flow battery technology into a robust and highly scalable product, featuring storage costs per kWh far beyond what is achieved with existing storage technologies. As such, the introduction of Elestor's storage concept will be an important accelerator for the energy transition.

What makes elestor unique?

With its unique system design, Elestor has matured flow battery technology into a robust and highly scalable product, featuring storage costs per kWh far beyond what is achieved by existing storage technologies.

Who founded elestor?

Elestor was founded in 2014 by Wiebrand Kout, an experienced scientist. Kout was convinced that he could invent a technological solution to one of society's greatest challenges, namely climate change. The following year, he was joined by physics graduate and seasoned businessman Guido Dalessi.

What makes elestor a cutting edge technology company?

"As a cutting edge technology company, we invest significant resources in research and development in order to ensure we remain ahead of rivals in the clean energy storage sphere," said Guido Dalessi, CEO, Elestor.

Why should you choose elestor?

Elestor's system design allows for large production volumes against low manufacturing costs. By combining the intrinsic advantages of flow battery technology with Elestor's proprietary and patented system design, the company is well positioned to gain leadership in the international industrial market segment (50 - 50,000 kWh).
