

Energy companies Tunisia

Who produces electricity in Tunisia?

State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity. The remainder is imported from Algeria and Libya as well as produced by Tunisia's only independent power producer (IPP) Carthage Power Company(CPC),a 471-MW combined-cycle power plant.

What are Tunisia's energy projects?

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

What is the energy sector in Tunisia?

The energy sector in Tunisia includes all production,processing and,transit of energy consumptionin this country. The production involves the upstream sector that includes general oil and gas,the downstream sector that includes the only refinery in Tunisia and most of the production of natural gas,and varied electrical/renewable energies.

How much power does Tunisia produce?

Tunisia has a current power production capacity of 5,944 megawatts(MW) installed in 25 power plants,which produced 19,520 gigawatt hours in 2022. State power utility company STEG controls 92.1% of the country's installed power production capacity and produces 83.5% of the electricity.

Does Tunisia have a solar power plant?

First utility-scale photovoltaic plant (10 MW,in Tozeur) was commissioned in 2019on German money. Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources,mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW).

Could nuclear energy be a viable alternative to fossil fuels in Tunisia?

The Tunisian government has partnered with Russia and France in hopes of establishing nuclear energy as a viable alternative to fossil fuels and taking up a nontrivial chunk of the energy production in Tunisia. This is expected to be accomplished in the 2020s. Sousse thermal power station, combined gas cycle belonging to STEG.

As one of the fastest growing renewable energy companies in the region, the company is rapidly expanding its investments in wind, solar, energy storage and green hydrogen, demonstrating its long-term commitment to the global energy transition.

Energy companies Tunisia

Today we have diversified our activities: in addition to exploration, development and production of natural gas, we operate in the chemicals and renewable energy sectors, confirming our commitment to the decarbonisation of the energy mix.

As one of the fastest growing renewable energy companies in the region, the company is rapidly expanding its investments in wind, solar, energy storage and green hydrogen, demonstrating its long-term commitment ...

This report lists the top Tunisia Power companies based on the 2023 & 2024 market share reports. Mordor Intelligence expert advisors conducted extensive research and identified these brands to be the leaders in the Tunisia Power industry.

Tunisia's power sector is well developed, and nearly the entire population enjoys access to the national electricity grid. Tunisia has a current power production capacity of 5,944 megawatts (MW) installed in 25 power plants, which produced 19,520 gigawatt hours in 2022.
