

Austria houses the flagship projects and areas but that they are distributed all over the country. The following main model regions focussing on different aspects and applications of the smart power infrastructure can be found in Austria: Smart Community Grottschönau; Smart Services for Linz Smart Infosystems Vocklabruck;

Transforming the energy system to 100% renewable energy requires not only intelligent technologies and solutions, but also new business models, using sector coupling or setting up integrated regional and local energy systems. Austria is an active player in transnational research partnerships, networking to share knowledge and experience, and ...

smart energy systems and grids is one of the main tasks in this area. Michael Paula Head of the Energy and Environmental Technologies Department Federal Ministry for Transport, Innovation and Technology If we are to meet the objectives and targets set for Austria, a number of measures at various different lev-

Smart grids are intelligent system solutions that can make a decisive contribution to evolve sustainable energy systems. National and international activities for research and technological development in the field of smart grids provide the basis for a sustainable energy supply system.

Smart Energy Systems (JPP SES) is to support transnational RDI projects for the development of intelligent, integrated energy systems to facilitate the supply of energy using up to 100% renewable sources. These research initiatives are supported by 32 national and regional public funding partners and partly

This work will give an overview on the Austrian solutions and concepts for a smart energy grid. Through the increasing electricity generation from renewable energy sources the power infrastructure not only in Europe received new stimuli to find unique and novel solutions.

Die Publikationsreihe energy innovation austria gibt Einblick in die österreichische Energieforschung und präsentiert spannende neue Konzepte und innovative Produkte. Basis bilden Forschungsprojekte, die im Rahmen der Programme des Bundesministeriums für Klimaschutz, Umwelt, Energie, Mobilität, Innovation und Technologie (BMK) und des Klima ...
