## **Energy storage battery nauru materials**

#### How does Nauru get its energy?

Nauru predominantly sources its energy through diesel power generators. About 5% of its current energy demand is sourced from renewable energy,of which all is from solar power photovoltaic (PV) installations. A 500-kW ground-mounted solar installation was commissioned in 2016,and a number of residences have rooftop solar PV installations.

### How will ADB support the Nauru solar power development project?

ADB also provided GoN support to prepare a Feasibility Studyfor the recommended Nauru Solar Power Development Project which will comprise of a 6 megawatt PV plant coupled with a 5 megawatt /2.5 megawatt-hour battery energy storage system coupled with a SCADA installation.

#### Who owns Nauru electricity?

The Nauru electrical network is owned and operated by Nauru Utilities Corporation(NUC), a state-owned enterprise, established under the Nauru Utilities Corporation Act of 2011. NUC is responsible for energy generation and energy distribution, and water supply. Nauru predominantly sources its energy through diesel power generators.

What is the impact of Nauru energy project?

The project impact is a reliable,affordable,secure,and sustainable energy supplyto meet the socio-economic development needs of Nauru. The outcome of the project will be that NUC,the state-owned power and water utility,will supply reliable and cleaner electricity.

#### How will Nauru's solar power system work?

The system will be fully integrated and automated with the existing diesel generation(17.9 MW installed capacity currently manually operated) to optimize solar energy use,to enable optimal BESS charging/discharging and to provide optimal shut off of the diesel engines. This will reduce Nauru's over reliance on diesel for power generation.

#### What is a Nauru power expansion plan?

The electrical network comprises 11kV, 3.3KV and LV overhead lines. Asian Development Bank (ADB) provided Government of Nauru (GoN) a transactional technical assistance TRTA to prepare a Nauru power expansion plan. The plan identified that a PV array and battery energy storage system should be constructed.
