What is a portable energy storage system?

The novel portable energy storage technology, which carries energy using hydrogen, is an innovative energy storage strategy because it can store twice as much energy at the same 2.9 L level as conventional energy storage systems. This system is quite effective and can produce electricity continuously for 38 h without requiring any start-up time.

Are enico's energy storages safe?

Enico's energy storages are reliable and safe, as well as sustainable in Nordic conditions. We are participating in the Vaasa EnergyWeek event from 11.-14.3. Come and meet us in the event's EnergyStore -day on Wednesday, March 13. Enico and NSC EnergyOpti Oy are joining forces for cooperation. NSC first invest was its own 3 MW energy storage.
