

How much energy will Portugal have by 2031?

REN foresees that the renewables capacity will increase to 23 GW by 2031 (around 12 GW for solar and 9 GW for wind). The Portugal energy market report provides expert analysis of the energy market situation in Portugal. The report includes energy updated data and graphs around all the energy sectors in Portugal.

Is grid access a scarce resource in Portugal?

Secretary of state for energy João Galamba said that grid access is a scarce resource in Portugal in an interview with PV Tech. Image: Portuguese government.

How much gas does Portugal import?

Portugal imports all the gas it consumes. Imports reached 4.3 bcm in 2023 (-25%), mainly as LNG. Imports reached a peak in 2017 at 6.2 bcm. Previously, they remained between 4 and 5 bcm over 2012-16. In 2023, gas imports came mostly from Nigeria (39%) and the USA (37%).

How are energy storage projects remunerated?

Storage projects are remunerated according to market rules, as the production facilities that inject electricity into the public network. The implementation of energy storage projects by public entities is subject to public procurement rules, requirements and related regulations.

What is the new legal framework for energy storage?

In order to attract further investment and speed-up implementation, the new legal framework, which was published in the beginning of 2022, provides a framework for standalone energy storage, subject to the previous control procedure, and to be owned by third parties who are separate from the power plant developers.

The hydroelectric T&#226;mega project [External link](#), opens in new window. It consists of three power plants: Gouv&#227;es, Daiv&#245;es and Alto T&#226;mega, located over the T&#226;mega River, a tributary of the Duero in the north of Portugal, close to Oporto. The three plants have a total installed capacity of 1,158 MW, which represents an increase of 6% of the country's total installed electricity ...

Portugal is a leader particularly in wind generation and is driving the rapid deployment of photovoltaic solar energy and battery storage. In efforts to increase renewable energy, Portugal expects to launch its first offshore wind power auction by the last quarter of 2023. This project has goals of reaching 10 gigawatts capacity by 2030.

The Winners Are Set to Be Announced for the Energy Storage Awards! Energy Storage Awards, 21 November 2024, Hilton London Bankside. Book Your Table. Features, Analysis, Guest blog. Negative energy prices: Why batteries are a flexible resource to mitigate impacts across Europe. By Dr Alastair Martin, founder

and chief strategy officer ...

In July 2021 China announced plans to install over 30 GW of energy storage by 2025 (excluding pumped-storage hydropower), a more than three-fold increase on its installed capacity as of 2022. The United States' Inflation Reduction Act, passed in August 2022, includes an investment tax credit for stand-alone storage, which is expected to ...

Capacity payments that solar-plus-storage developers could earn from winning in Portugal's big 700MW solar tender are an interesting step, but will likely only be a supplementary income to add to what could be earned from ancillary services, Energy-Storage.news has heard. "I would say that it's an interesting first step, because actually we do ...

BloombergNEF's Battery Price Survey predicts that pack prices for stationary storage and electric vehicles (EVs) will fall to \$101/kWh within three years. Average pack prices have sat at around \$137/kWh this year, 89% lower than in 2010 and nearly a fifth of their cost seven years ago. ... BloombergNEF's head of energy storage research and ...

The average wholesale electricity price in Portugal stood at 73.54 euros per megawatt-hour in September 2024, a decrease from the previous month. ... Historical consumer price estimates for energy ...

Enerland bid EUR11.14/MWh (US\$13.12), or US\$0.0131/kWh, for a 10MW lot in last week's auction, below the most recent industry record tariff of US\$0.0135/kWh set by the Al Dhafra project in Abu Dhabi in April. Of the total ...

The Gouvães plant will increase Portugal's pumped hydro power by 30% from where it is today. The 2.6-mega energy storage complex is being built on the 2.6-mega river with EUR1.5 billion (US\$1.69 billion) of investment by Iberdrola, with the help of a EUR650 million loan from the European Investment Bank (EIB).

Berlin, April 25, 2012 -- With more European countries harnessing their hydropower resources to stabilize their transmission grids and support greater alternative energy production, GE Energy's Power Conversion business will supply its advanced power conversion technology to Voith for the new Frades II pumped-storage hydropower plant.

Concerning the current status of energy storage in Portugal, ... or very specialized equipment such as cryogenic storage or CAES, are not adequate for DES. Also, as space to install the DES is normally an issue, compact technologies that do not have moving or separated parts are more suitable, among which batteries are currently seen as a good ...

Galp, a Portuguese energy company, has announced plans to build a 5 MW/20 MWh battery storage system in

Portugal, in collaboration with Powin. The system at one of Galp's solar plants will enable ...

The fall in lithium carbonate prices from the highs of 2022 is only a small factor, CEA said. Energy-Storage.news" publisher Solar Media will host the 5th Energy Storage Summit USA, 19-20 March 2024 in Austin, Texas. Featuring a packed programme of panels, presentations and fireside chats from industry leaders focusing on accelerating the ...

In the rapidly growing but still relatively new battery energy storage sector, equipment procurement and integration for large projects presents numerous risks. Jared Spence of IHI Terrasun explores some steps developers should follow to reduce exposure. ... Like many commodities, the price of lithium carbonate futures saw dramatic swings from ...

The isolation of Portugal's electrical grid is hindering the growth of renewables, according to GlobalData's latest report. Storage will play a pivotal role if the country hopes to achieve its...

Energy storage installed capacity in Portugal is still predominantly based on hydropower pumping, which is today over 3 GW, and will increase to 4,164 GW when the Alto-T&#226;mega dam is completed this year. However, this paradigm is about to shift with the democratization of energy storage solutions with wind and solar production.
