For more information, go to the website.

In a two-part video interview with PV Tech Storage, Wolfram Walter, founder of battery manufacturer ASD Sonnenspeicher, said electricity storage suffered from an image problem. He describes to Andy Colthorpe how his company is marrying cutting-edge technology with cool design to appeal to a broader market.

Yes, we're above 30% renewables now in California, and we hit 20% pretty easily without needing storage. But really, storage is becoming an increasingly important part of the energy mix because of the high levels of ...

2 ???&#0183; Head of storage Bozkurt Aydinoglu, has told NPM that Aukera Energy is in conversations with potential lenders as it looks to secure debt financing for a 299.75 MWh BESS project that it is developing in Ialomi?a county, Romania.. The project is approaching ready-to-build but still requires its building and environmental permits, which are expected in Q1 2025.

Energy-Storage.news heard from Hydrostor's CEO Curtis VanWalleghem on how the company believes it has improved compressed air to be competitive and a key part of the future energy system. The CEO explained more about the Goldman Sachs Asset Management investment and why A-CAES is "reliable capacity which can be located where you need it".

The German government has opened a public consultation on new frameworks to procure energy resources, including long-duration energy storage (LDES). Under the proposed Kraftwerkssicherheitsgesetz, loosely translated as the Power Plant Safety Act, the Ministry for the Economy and Climate Change (BMWK) would seek resources, including 12.5GW of ...

Yes, we're above 30% renewables now in California, and we hit 20% pretty easily without needing storage. But really, storage is becoming an increasingly important part of the energy mix because of the high levels of penetration. As a result, intelligence around energy storage is starting to make its way onto the grid.
