

2025 is set to be a pivotal year for the global energy transition, as we reach the halfway point in a significant decade for the planet on its path to net zero. Our Summit aims to highlight the fundamental role that energy storage will play in this journey, and will strive to recognise, explore and analyse key challenges that may present themselves on the trajectory ahead.

Now in its 7th year, the Summit is not only America's Largest Energy Storage Conference but is the only place where you are guaranteed to meet all the most important investors, developers, IPPs, RTOs and ISOs, policymakers, utilities, energy buyers, service providers, consultancies, and technology providers in one room.
