How can the energy sector improve in Sierra Leone?

For the energy sector in Sierra Leone to improve and meet these targets at the rate required, some transformative changes are needed. Robust and resilient solutions, acceptable to a range of different stakeholders, are needed across the energy sector.

What is the current state of energy in Sierra Leone?

The current state of Sierra Leone's energy sector is in acute need of improvement: 80% of Sierra Leoneans do not have access to electricity [1]. Of those that have access, 17% are connected to the grid and another 2-3% are connected to solar, mini-grid or portable home energy systems [ibid].

What do you like most about enernova?

EnerNova provides much more than just competitive rates; They give market knowledge, pair you with the contracts and products that match your needs, and their service and responsiveness is unmatched. EnerNova has been an important advocate for our business. I have always appreciated Denise's personal approach. She truly makes energy look easy!

What is a Sierra Leone energy roadmap?

The roadmap [1] is a document that identifies, at a high level, what the government wants and how they want it. It lays out a vision for the energy sector in Sierra Leone. The intent is for IPPs proposing projects to fit into the vision defined by the roadmap.
