

Can Estonia develop a hydrogen refuelling network?

Estonia received 23 applications in April for a EUR1.5 billion EU call for hydrogen projects. PowerUp and Alexela, an Estonian energy company, applied to develop a network of hydrogen refuelling and cylinder exchange stations that could be used by consumers. Other players like Skeleton Technologies and Elcogen also applied.

Is Estonia a leader in the energy revolution?

Estonia has a diversified energy sector which comprises long-standing expertise in oil shale, a sizeable renewables sector and growing CleanTech capability. World-class expertise within a highly digital, pro-business environment will see Estonia play a leading role in the energy revolution. World-class education in science, maths and IT.

Could a hydrogen-producing plant be repurposed in Estonia?

And one potential means for export is hydrogen. Estonia is even weighing building a hydrogen-producing plant in Ida-Viru County in eastern Estonia, traditionally a region of energy production focused on oil shale extraction, but that may be repurposed to serve this new focus on renewable energy production and export.

Does Estonia have a cleantech sector?

According to Pohlmann, a German national, Estonia's cleantech sector benefits in multiple ways from both its location, plus extensive expertise in IT. "The size of a country doesn't make up its energy usage, but the size of its population does," says Pohlmann.

Is Estonia sitting on massive oil deposits?

Estonia may not be sitting on massive oil deposits, but it does... Estonia may not be sitting on massive oil deposits, but it does have plenty of wind, water, and, occasionally, sun.

Can Estonia become a hydrogen energy powerhouse?

Estonia may not be sitting on massive oil deposits, but it does have plenty of wind, water, and, occasionally, sun. That may be enough to turn this country of islands, bogs, and ingenuity into a hydrogen energy powerhouse, if its talents can put their heads together and work prodigiously. The country's hydrogen energy sector is inarguably young.

The EUR100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery storage complexes with a combined capacity of 200 MW and a total storage capacity of 400 ...

Same as in Finland, the policy documents referred to national climate and energy strategy. Akin to Estonia, there were conflicting objectives and measures between integrating traditional energy policy versus low-carbon energy policy.

Estonia is booming with energy innovations -- from novel hydrogen tech to supercapacitors and beyond, the sector is producing more and more bright ideas to ease the green transition. Yet this could be only the beginning, as new partnerships are formed.
