

Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

Who owns Eswatini electricity?

At present, the state-owned Eswatini Electricity Company (EEC) holds a majority share in Eswatini's energy market. Tasked with the generation, transmission, and distribution of electricity within the country, the EEC operates three hydropower plants and one diesel power plant, with a combined capacity of approximately 70 megawatts (MW).

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

Why is Eswatini a beacon of inspiration for other developing countries?

As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation. This positions Eswatini as a beacon of inspiration for other developing nations navigating toward a self-reliant future.

Is Eswatini a potential site for wind power development?

Numerous potential sites for wind power development have been pinpointed, offering wind speeds ranging from 6 to 8 metres per second. Additionally, Eswatini's substantial biomass resources, particularly sugar cane residues, present opportunities for electricity generation through cogeneration.

What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

Heavily reliant on neighbouring South Africa for almost everything, including most of its electricity, Eswatini is trying to become more economically independent, but poor ...

o To strive to provide all households with access to modern energy by 2030. o To develop 40 MW Solar PV and 40 MW Biomass project by 2024 o To ensure energy security by 2026 (baseload ...

Eswatini orcan energy

The Eswatini Electricity Company (EEC) is engaged in the business of generation, transmission and distribution of electricity in the Kingdom of eSwatini. Our technical expertise in the power ...

The evolution of Eswatini's energy in renewable sector bears the potential for significant national benefits, including enhanced energy security, reduced import dependency, and diminished greenhouse gas emissions.
