

What is Eigl's new Atlas?

Combined with other datasets, the new atlas boosts EIGL's spatial analysis capabilities. It consists of a series of EU maps with the demand of the main groups of energy products from each category of economic activity, zooming in at an unprecedented level of 1x1 km.

Why is energy storage important in the EU?

It can also facilitate the electrification of different economic sectors, notably buildings and transport. The main energy storage method in the EU is by far 'pumped hydro' storage, but battery storage projects are rising. A variety of new technologies to store energy are also rapidly developing and becoming increasingly market-competitive.

What is a new energy Atlas?

Zooming in on areas as small as 1x1 km, a new atlas provides data on energy demand and looks into energy scenarios until 2050. It makes for a powerful tool for policymakers and infrastructure planners working on the energy transition.

What is the JRC high-resolution EU Energy Atlas?

The JRC high-resolution EU energy atlas is a new dataset embedded in the Energy and Industry Geography Lab (EIGL), a tool that finds, filters and maps energy-related data. Combined with other datasets, the new atlas boosts EIGL's spatial analysis capabilities.

What is EU Energy Atlas - demand 2019?

Dataset: EU energy atlas - demand 2019 Zooming in on areas as small as 1x1 km, a new atlas provides data on energy demand and looks into energy scenarios until 2050.

Can energy storage help the EU decarbonise its energy supply?

A number of EU countries have also teamed up for 'Important Projects of Common European Interest' on batteries research and innovation. Energy storage can help increase the EU's security of supply and support decarbonisation.

"By identifying North American geological formations with large carbon dioxide storage potential, this new atlas provides the kind of fundamental information that, combined with technology innovation, can help fossil-fueled facilities continue their essential energy role while reducing carbon pollution," said Energy Secretary Steven Chu.

Projects are being launched by newcomers like FREYR and Northvolt, automotive OEMs like Tesla and VW, and established cell producers from East Asia like BYD, LG Chem and CATL. Most planned capacity is set to

go to the EV market rather than stationary energy storage, but a bottleneck in the supply of the former has knock-on effects on the latter.

The 8th Energy Storage Summit, Europe's largest event on energy storage innovation, investment and policy, is here to help. More information. Upcoming events. 22. Feb 2023 - 23. Feb 2023 ... developed under the PANTERA project which has received funding from the European Union's Horizon 2020 Research and Innovation programme under GA No ...

The European Energy Atlas 2018 is published at a time when the EU Member States are discussing their energy and climate strategy until 2030. It thereby not only provides a compass on the differing energy discussions in Europe but also reveals how a Europeanization of the energy transition will be the more efficient and cost-effective option for all Europeans.

On June 19, CATL unveiled TENER, the world's first mass-producible energy storage system with zero degradation in the first five years of use. CATL unveiled this breakthrough technology at ees Europe, the largest and most international exhibition for batteries and energy storage systems in Europe. Powering Innovation The TENER energy storage ...

About Atlas Renewable Energy. Atlas Renewable Energy is an international renewable energy generation company with about 5.6 GW of renewable energy assets, of which 2.7 GW are operational. Atlas ...

As part of its "Fit for 55" package, one of the European Green Deal ambitions is to provide clean, affordable, and secure energy. It strongly relies on hydrogen amongst others [2]. Underground Hydrogen Storage (UHS) is viewed as an effective strategy for storing large volumes of surplus electrical energy from renewable sources [3,4].

From reducing reliance on fossil fuels to increasing energy efficiency, the Atlas Project charts a course towards a brighter and more resilient agricultural ecosystem. Conclusion: In the quest to power agriculture sustainably, the Atlas Project stands as a ...

The Pan-European Thermal Atlas is designed to be implemented at a pan-European scale. It provides data and resources for assessing thermal energy potential across Europe, covering multiple countries and regions. Type. The Pan-European Thermal Atlas is a web-based platform accessible through a web browser.

Atlas of lithium geothermal fluids in Europe. Author links open overlay panel Blandine Gourcerol a, Bernard Sanjuan a, ... a strategic metal due to its extensive consumption in electro mobility and stationary energy storage technologies. ... This activity has received funding from the European Institute of Innovation and Technology (EIT), a ...

The role of the storage in the future European energy system Andreea Strachinescu, Head of Unit "New

energy technologies and innovation" - DG Energy - European Commission . Revolution/evolution in the natural gas markets By Andr s Gy rk, Member of the European Parliament . Innovative technologies to lower cost of energy offshore wind farms

at a later stage or to deliver the heat directly. For example, solid-state thermal energy storage can be used for both purposes. Table 1. CETO SWOT analysis of the competitiveness of novel thermal energy storage technologies Strengths Promising research in novel thermal energy storage technologies, with several ongoing pilot projects.

Lithium is one of the rarest elements in the Earth's crust and demand for it is continuing to rise, leading European researchers to seek alternative materials and compounds, which, if successful, could have a major long-term impact on the evolution of ...

Atlas Copco Power Technique Belgium has showcased its ZenergiZe Energy Storage Systems at stand B52 of the Matexpo exhibition in Kortrijk (Belgium). The ground-breaking energy storage system from Atlas Copco has won the third prize of the Matexpo Innovation Award.

BATTERIES FOR ENERGY STORAGE IN THE EUROPEAN UNION ISSN 1831-9424 . This publication is a Technical report by the Joint Research Centre (JRC), the European Commission's science and knowledge service. ... It monitors EU research and innovation activities on clean energy technologies needed for the delivery of the European Green Deal; and ...

The JRC high-resolution EU energy atlas is a new dataset embedded in the Energy and Industry Geography Lab (EIGL), a tool that finds, filters and maps energy-related data. Combined with other datasets, the new ...
