

Finland community batteries

What is Finland's battery strategy?

Finland's battery strategy will aim to promote the sustainable use of natural resources, for example through solutions for accessing, optimising and recycling materials. The working group to prepare a national battery strategy will be chaired by Mika Nykänen, Director General of the Geological Survey of Finland.

What is batteries from Finland?

Batteries from Finland -project is enhancing the growth of knowledge basis and global competitiveness along the entire battery value chain -from raw material production to battery cell production, battery applications and recycling. The study was commissioned by Business Finland and jointly executed by Gaia Consulting and Spinverse.

Are companies interested in joining a Finnish battery ecosystem?

COMPANIES (55%) and ORGANIZATIONS (88%) currently active within the Li-ion battery value chain in Finland are very interested in joining a Finnish Battery Ecosystem. The attractiveness of Finland as operational environment for COMPANIES currently active within the Li-ion battery value chain in Finland was mainly considered as

Is Finland a leader in the battery industry?

GigaVaasa /Facebook Finland is placing itself at the forefront of the battery sector, boosted by recent significant investments in industrial production and green innovations. In early 2021, Finland outlined a national battery strategy aspiring to elevate its industry to pioneering status by 2025.

Can Finland be a pioneer in sustainable battery manufacturing & recycling?

The Ministry of Economic Affairs and Employment has launched work to formulate a national battery strategy that will enable Finland to strengthen its role as a pioneer in sustainable battery manufacturing and recycling. Minister of Economic Affairs Mika Lintilä; appointed a working group on 24 June to prepare the strategy by the end of 2020.

Will Finland become a pioneering battery industry by 2025?

In early 2021, Finland outlined a national battery strategy aspiring to elevate its industry to pioneering status by 2025. The significance of this goal is pressing: the value of the European battery market is tipped to reach 250 billion euros by that year driven by significant carbon reduction milestones looming Europe in the near future.
