

The research group investigates and develops materials and devices for electrochemical energy conversion and storage. Meeting the production and consumption of electrical energy is one of the major societal and technological challenges when increasing portion of the electricity production is based on intermittent renewable sources, such as solar and wind power.

The Finnish strategy's launch coincided with a broader move to fast-track growth in Europe's energy storage market this week. The European Commission gave the green light to a EUR2.9 billion (US\$3.5 billion) investment for 46 development projects in 12 member states. The projects will focus on four core areas of battery storage manufacture ...

About Finnish Minerals Group. The mission of Finnish Minerals Group is to responsibly maximise the value of Finnish minerals. We manage the State's mining industry shareholdings and strive to develop the Finnish value chain of lithium-ion batteries. In addition, we are engaged in long-term technology development of the mining and battery ...

Swiss investment fund and project development vehicle MW Storage has contracted Fluence to supply and integrate a 20MW battery storage asset in Finland. The project will be a 1-hour duration (20MWh) battery energy ...

Image: PGE Group . Energy storage developer Pacific Green has agreed to acquire two large-scale in-development battery energy storage system (BESS) projects in Poland, Europe. The acquisition of two 50MW projects totalling 400MWh of capacity marks the developer's first entry into Poland, which is fast becoming a key market for energy storage ...

In the energy storage team, we work with a large variety of different energy storage technologies to support the transition to renewable energy production. ... an Academy of Finland project led by Prof. Annukka ...

Finnish Minerals Group, a mining and battery industry development and investment company, and FREYR Battery will cooperate to assess the feasibility of establishing an LFP cathode material plant in the city of Vaasa. ... iron and phosphate--is needed especially in the large-scale energy-storage battery segment. In the initial study phase ...

YIT, Vantaa Energy and AFRY are planning the construction of the world's largest seasonal heat storage using the alliance model. At one million cubic metres in size, the underground seasonal heat storage will have a total capacity that corresponds to the annual heating demand of a medium-sized Finnish city.

Finland Markets ... AtoB@C, Metsä Group join forces to slash wood transport emissions. Categories: ... Research & Development; Posted: about 1 month ago Gas TSOs conclude pre-feasibility study on Nordic-Baltic Hydrogen Corridor. Categories: Business Developments & ...

Polar Night Energy, a Finnish thermal energy storage solutions start-up founded in 2018, announced that it has raised EUR 7.6 million (USD 8.19m) in a seed round that will help it grow its business. Polar Night designs and manufactures a patented high-temperature, large-scale heat storage solution that uses sand as the storage medium.

Ardian, in partnership with its operating platform eNordic, has taken final investment decision to build Mertaniemi battery energy storage project, a 38.5MW one hour utility scale battery energy ...

For example, Solnet Group has invested heavily in research and development, leading to energy storage possibilities and grid optimization. These advancements are critical for optimizing grid operation and stabilizing energy consumption. ... Solnet Group has started planning Southern Finland's largest solar park, together with Finnish ...

Mertaniemi battery energy storage project is a joint venture between ACEEF and Lappeenrannan Energia, a Finnish municipal energy company. It will see the development of a 1-hour 38.5 MW energy storage system. The project is due to complete in spring 2025 and is located near the Mertaniemi power plant in Lappeenranta. In addition to the energy ...

"We are happy to have accomplished our first acquisition in Finland, and the trust shown by Suomen Voima's owners to let Locus Energy take on the responsibility for the continued development of the hybrid park in Hamina. Finland is a core market for Locus Energy where we are currently building a pipeline of both wind, hydro and CHP assets."

The IEA report recommends that the Finnish government should support the deployment of energy storage solutions in order to accelerate the transition to a low-carbon energy system. It also suggests that policies should ...

Finnish utility Helen is launching a 40MW battery energy storage system (BESS) project in Nurmijärvi, southern Finland, and aims to begin commercial operation in 2025. The project is being developed by investor Evli-Rahastoyhtiö Oy, which will continue as a co-investor alongside Helen once the project is completed.
