Wana Energy Solutions started in 2008 on the premise that Liquefied Petroleum Gas (LPG) is a Clean, Accessible, Reliable, Energy (CARE) that can improve the lives of the almost 26 million ...

Wana Energy Solutions started in 2008 on the premise that Liquefied Petroleum Gas (LPG) is a Clean, Accessible, Reliable, Energy (CARE) that can improve the lives of the almost 26 million people in Uganda who rely on biomass as a source of energy for cooking.

Wana is an influential Ugandan LPG distributor that is giving out healthy cooking fuel choices in a nation where the popular cooking techniques are worsening deforestation and creating significant health risks for consumers.

Wana Energy Solutions (WES) aims to implement a program to distribute cleaner cooking solutions to at least 1,500 households in the Kisenyi area in Kampala Central, Uganda. The solutions include a Light Petroleum Gas (LPG) stove, gas cookers, energy-saving stoves, briquettes, and electric pressure cookers.

The Ugandan company Wana Solutions Uganda Ltd (Wana Energy) provides energy-efficient cooking solutions for people from poorer income groups in Uganda. To do this, the company relies on liquefied petroleum gas (LPG), which is a cost-effective and fuel-efficient alternative to firewood or charcoal.
