For instance, Central Georgia Electric Membership Corporation has a loan program for up to \$25,000, and a new program, Georgia Bright, aims to help low-income homeowners install solar on their roofs. 4. Net metering rates in Georgia: wholesale rate

How much does a solar panel cost in Georgia?

Solar panel installation costs: \$10,000 to \$30,000 Average solar panel costs in Georgia are comparable to the national average. Before the federal solar investment tax credit (ITC), a typical residential system ranges from \$13,650 to \$27,300. That price drops to \$9,555 to \$19,110 after considering the full 30% tax credit.

Where should solar panels be installed in Georgia?

Georgia (and the rest of the United States) is in the Northern Hemisphere, so solar panels perform best on south-facing roofs. The worst place to install would be on north-facing roofs, especially if those roofs have a high pitch.

Does Georgia Power Company offer a solar extension program?

The Public Service Commission Order pertaining to Dockets 4822, 16573, and 19279 states that Georgia Power Company is to provide existing solar participants the option to extend the term of their current Distributed or Utility Scale generation for up to 35 years. Please select from the following options for more information surrounding your program.

Are solar panels a good investment in Georgia?

The main drawback is the high upfront cost of purchasing and installing the equipment. On the bright side, once that's paid for, solar panels can significantly reduce or even eliminate your electricity bills. For many Georgians, the long-term savings outweigh the upfront costs over time.

Use our residential solar advisor tool to explore considerations and estimated costs for a solar panel installation on your home. Get real life figures to help you determine the best solar program for you and your goals.
