Gibraltar is ushering in an era of sustainability and resilience with a progressive plan to install energy storage systems near the North Mole Power Station. The implementation ...

The proposed battery energy storage system would replace the current bank of back-up diesel generators beside the power station. The BESS installation will have zero yearly emissions and as a result zero fuel costs. Earlier this month, GibElec CEO Michael Caetano told GBC that the battery would be installed over the next year.

In the past three years, approximately half of Gibraltar's power cuts have been a result of generation issues at the North Mole power station and the Electricity Authority believes these should be dealt with by the proposed Battery Energy Storage System.

Gibraltar is ushering in an era of sustainability and resilience with a progressive plan to install energy storage systems near the North Mole Power Station. The implementation of ten new prefabricated containers equipped with cutting-edge battery technology represents a significant leap forward in the territory's electric grid capabilities.

## Gibraltar exult power battery

The BESS will provide instant back-up power to the Gibraltar Electricity Authority's electricity distribution network in the event of engine failure as well as providing system frequency support to assist with load variations and disturbances in the grid.

Buy Exult Power Battery for unmatched reliability and performance. With advanced tubular technology, it offers longer lifespan, reduced maintenance, and superior deep-cycling capabilities. Experience uninterrupted power supply and cost-effectiveness for backup solutions, renewable energy storage, and UPS applications.

Plans have been filed with the Development and Planning Commission for a battery energy storage station [BESS] at the North Mole power station that will provide resilience to Gibraltar's electricity supply and reduce the Rock's carbon footprint.
