Will Greece become a net exporter of energy?

There are multiple high profile electricity interconnector projects in discussion, with two aiming to connect Greece with Egypt for the purpose of exporting renewable energy into Greece and beyond. As Greece further develops these projects, it positions itself to become a net exporter of energy in the region.

How did Greece's grid infrastructure lose value after the financial crisis?

Following the financial crisis, Greece's grid infrastructure lost value in what can be classified as a disinvestment of 150 million Euros a year when there should have been an investment of about 300 to 400 million Euros a year. Greece's target to shift from lignite towards renewable energy sources further propel such efforts.

Does Greece have a LNG terminal?

Greece has been making inroads into LNG infrastructure development for several years. The 2018 expansion of its LNG Terminal allowed for the nation to receive larger quantities of LNG. This is coupled with another expansion, set to be completed this year.
