

Guernsey solar panel for schools

Solar panels can help lower your electricity bills and they only require daylight to work, even if the sun is not shining you are still getting free electric! Here at Island Electrics Ltd, we can help ...

Here you can find a list of installers supplying Solar Panels and Solar PV systems in Guernsey and the surrounding area. You can contact them using the "Get a Quote" system and ask them for information or a quotation at your leisure.

We invest in our team's growth through continuous training and education, making us a dynamic learning organisation. But there's more: We're renewables geeks fueled by a passionate cause--to fight and reverse climate change. Every solar panel we install, every watt of clean energy harnessed--it's a step toward a zero carbon world.

In 2023 Guernsey Electricity worked in conjunction with The Little Green Energy Company to install the vast community-scale solar array at Grow Limited's newly redeveloped headquarters. The 310 photovoltaic (PV) panels will produce 129-kilowatt peak power (kWp).

The Little Green Energy Company have just installed 309 roof mounted solar panels with Guernsey Electricity Limited on the power station, Northside, Vale, creating the largest solar array in the Channel Islands, generating over 100kWp of power.

Solar panels can help lower your electricity bills and they only require daylight to work, even if the sun is not shining you are still getting free electric! Here at Island Electrics Ltd, we can help consult and advise on what would be best for your property as well as look after your installation with full servicing.

The EcoChallenge is open to all schools within the Bailiwick of Guernsey. Working in teams of two, three or four pupils, your challenge is to consider one major project or a few smaller ways you could improve your school's environmental sustainability.

More commonly known as Solar PV, these panels are designed to produce clean, renewable electricity from the sun to power your home. It's also possible to sell the electricity your system generates to Guernsey Electricity to supply the island with even more renewable electricity.

Solar electricity panels, also known as photovoltaics (PV), capture the sun's energy and convert it into electricity that you can use in your home. You'll need a more or less south-facing, unshaded roof or garden area. You'll then need to think about your current electricity demand and what size of system you might need.
