The World Bank, IDA, ESMAP, and GCF are funding Guinea-Bissau's first solar power plants with a \$78.15 million investment to support decarbonization and expand electricity access. The project will build solar plants near Bissau and install mini-grids on the Bijag&#243;s islands, thereby providing electricity to 1,200 households and SMEs.

Harnessing Guinea-Bissau's abundant solar resources presents an efficient and cost-effective solution to addressing the country's energy deficit. The Solar Energy Scale-up and Access Project is slated to benefit residential, commercial, and industrial consumers nationwide, including those on the islands.
